

Virtual Learning Spring 2020

Internet: We have surveyed all families and internet is available in some form in every home. If you have internet issues please first call the teacher. If it is not solved there, please call the school at 575-278-2611. Tech support can be reached on the **Remind app: @c7g8ef**

Wifi: We have turned up the school Wi-fi so students can access the internet on the school devices in the school parking lot in the safety of their vehicles if needed.

Curriculum: 5-12th Students will access curriculum on **Edmodo** site. Students have passwords and they were emailed to all 7-12 students on Friday, April 3 to their school email accounts, which can be accessed on their school ipads. 11-12th grade will access school email through the bacavalley.com webmail. The password is the same as their network password followed by an exclamation point (!). Fifth and sixth grade student's teachers have been in close contact with parents and that same info was emailed to parents. Edmodo is where students will access videos of teachers teaching and turn in assignments.

k-4th grade students will access curriculum through **SeeSaw** app. Here videos of teachers teaching is accessible. This is also where students will turn in their work.

Zoom is a platform that teachers and students can interact in a live format. Teachers will use ZOOM to help students with problems, answer questions and create classroom discussions. Teachers have included their zoom codes in the emails to students and families.([http: Zoom.us](http://Zoom.us))

Learning apps on ipads: Continue to use the additional apps teachers have supplied for enrichment and continuous learning.

We will be emailing a document next week that will have some basic troubleshooting steps for possible technology problems.

Social Emotional Support: This is a great site to help. We know many students, teachers and parents are anxious about this change. Please look at this resource Mrs. Jill created. We are here to help you!
